Pioneering Holistic Health For 40 Years!

Fascial Manipulation & Motion Acupuncture for Pain Management Workshop

EXTRAORDINARY METHOD TONGUE DIAGNOSIS & CLINICAL APPLICATION

Carla Stecco, MD, PhD

Professor of Carla Stecco, University of Padova, Italy | Orthopedic Surgeon |
Internationally recognized expert in fascia research

Professor Stecco is internationally recognized as a leading authority in fascial anatomy and physiology. Her research has greatly advanced scientific understanding of connective tissue structure, function, and its role in pain and movement.

She has published more than 260 academic papers and authored several classic textbooks on Fascial Manipulation®, which have been translated into 11 languages. She also published the first atlas of human fascial imaging by Elsevier. Her research has been widely applied in orthopedics, rehabilitation medicine, physical therapy, and manual therapy.

This seminar brings together internationally renowned fascia anatomy experts and acupuncture clinical experts to deeply explore the integrated application of modern fascia science and Motion Acupuncture Therapy, providing a more systematic and cutting-edge integrated medical approach for clinical practice.

Decheng Chen, PhD

Founder of Motion Acupuncture Therapy
Director, New York Natural Acupuncture Health Center

Dr. Chen integrates traditional sinew-meridian theory with modern fascial, muscular functional anatomy, and movement assessment, creating an innovative acupuncture system. He has published 20 books on Chinese medicine and acupuncture, including Motion Acupuncture Medicine, as well as more than 100 academic papers.

His core clinical concept is: precise point selection, effective needling, and movement as the core, combining dynamic needle retention with functional movement to release fascial tension, restore movement function, and improve neuromuscular coordination.

Ideal for:

- *Acupuncturists
- *Massage Therapists
- *Holistic Practitioners
- *Wellness Professionals
- *TCM Students
